

Bringing traditional luxury to modern architectural designs

batavia
LIVING FURNITURE

Batavia Living has over 12 years of experience in manufacturing synthetic rattan outdoor furniture and is a global supplier of many luxury furniture brands and resort projects.

In 2020, we started to manufacture customized synthetic rattan panel product for architectural use which can be used for both interior and exterior decorative façade.

We work with architects and interior designers to provide their masterpiece with an element of Indonesian traditional handcrafted luxury made by Javanese skilled weavers.

We manufacture synthetic rattan panel with aluminum frame. Clients are required to provide the details of the dimensions and the general outlook of the project. 2D architectural drawing of the panel section can help us to quickly calculate the cost.

We also provide survey visit service, measurement service, and also the final installation if required. These added services are optional. However, most of the time they have to be included for accuracy purposes.

We create traditionally handcrafted weaving with extraordinary customizable patterns with skilled artisan weavers that have been trained for many years under our nurturing.

We provide hundreds of jobs for our valued weavers who are very dedicated for their work.

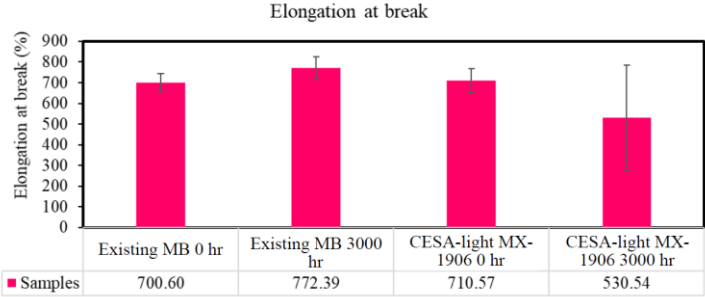

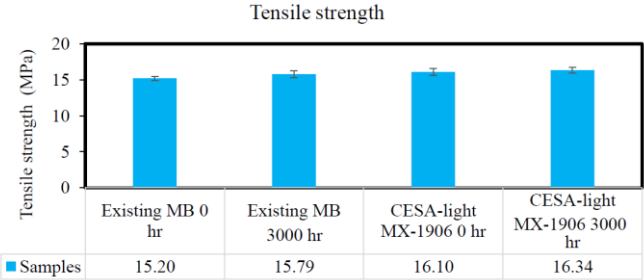

We use all-weather HDPE synthetic rattan which is eco-friendly and 100% recyclable. Our weaving process is sustainable as the leftover wastes are recycled.

Lab Requested No.: 102470-20

2. Flat artificial rattan

Figure 2. Tensile properties of flat artificial rattan.

- Lab tested high quality materials
- Fully waterproof and bio-resistant
- Sunlight-resistant gives color fastness for 8 years before slight change (anti-UV tested in lab using artificial weathering)
- Lightweight and fully powdercoated rustproof aluminum frame
- Competitive pricing straight from integrated factory with internal pipe extruder machine for better quality control
